SUBJ: Enclosed Report

The bear report has been generated in a manner similar to other 1986 big game reports. However, since the sample size was small (10%), our report includes only statistics at the regional and state levels.

There are two license/permit type categories for resident and nonresident bear licenses and combinations. There are 0s or no data for the resident combination categories because they are included in the bear license category. The nonresidents were broken into nonresident bear license holders and nonresident combinations.

Sample sizes for archery were also small (8%) and should be reasonably correct for statewide results. Regional summaries should be considered as estimates with wide confidence intervals.
